Tanmay Rajendra Pawar

Aspiring IT professional seeking an entry-level role to apply technical skills and contribute to a dynamic team

PROJECTS

Online Food Order Management System Oct 2021 - Dec 2021

- I have experience in developing and managing an Online Food Order Management System, showcasing my proficiency in software development and project management.
- This system enables users to conveniently order food online, streamlining the entire process from menu selection to delivery.
- I played a pivotal role in designing user-friendly interfaces, integrating secure payment gateways, and implementing efficient order tracking features.
- This project not only demonstrates my technical skills but also highlights my ability to create solutions that enhance user experience and optimize operations in the food industry.
- Languages used were HTML , CSS, JAVASCRIPT and tools used were VISUAL STUDIO ,Google spreadsheets.

STUDENT RESULT MANAGEMENT SYSTEM May 2022 - Aug 2022

- I have experience in designing and implementing a Student Result Management System, showcasing my skills in software development and educational administration.
- This system automates the process of recording and managing student academic results, ensuring accuracy and efficiency.
- My role included creating intuitive interfaces for teachers and students, implementing secure data storage, and generating comprehensive reports.
- This project reflects my ability to leverage technology to simplify academic processes and improve educational outcomes.
- Languages used in this project were HTML, CSS, JS, JAVA, MYSQL.

COLLEGE ATTENDANCE MANAGEMENT SYSTEM FEB 2023 – JULY 2023

- I have experience developing a College Attendance Management System, which demonstrates my expertise in software development and education administration.
- This system automates attendance tracking for students, streamlining record-keeping and enhancing overall efficiency.
- My responsibilities included creating user-friendly interfaces for instructors and students, implementing secure data storage, and generating attendance reports.
- This project highlights my ability to leverage technology to simplify administrative tasks and promote better attendance monitoring in educational institutions.
- Languages used in this project were PHP , CSS , HTML, JS , MYSQL and XAMP server .
